NEW QUESTION: 1

Which of the following procedures would BEST determine whether adequate recovery/restart procedures exist?

- A. Turning off the UPS, then the power
- B. Reviewing program code
- C. Reviewing program documentation
- D. Reviewing operations documentation

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Operations documentation should contain recovery/restart procedures, so operations can return to normal processing in a timely manner. Turning off the uninterruptible power supply (UPS) and then turning off the power might create a situation for recovery and restart, but the negative effect on operations would prove this method to be undesirable. The review of program code and documentation generally does not provide evidence regarding recovery/restart procedures.
