Oracle Cloud

Infrastructure as a Service (IaaS) allows you to provision and manage virtual machines (VMs) in the cloud. You can choose the operating system, hardware configuration, and network settings for your VMs. This gives you the flexibility to run your applications in the cloud without having to manage the underlying hardware. IaaS is suitable for applications that require a high degree of control over the operating system and hardware.

Answer: D

Explanation:

Explanation

You can change the shape of a virtual machine (VM) instance without having to rebuild your instances or redeploy your applications. This lets you scale up your Compute resources for

increased performance, or scale down to reduce cost. When you change the shape of an instance, you select a different processor, number of cores, amount of memory, network bandwidth, and maximum number of VNICs for the instance. The instance's public and private IP addresses, volume attachments, and VNIC attachments remain the same.
