**Answer: B**

Explanation:

Explanation

About Altering the Default Full Data Redaction Value  
You can alter the default displayed values for full Data Redaction polices. By default, 0 is the redacted value when Oracle Database performs full redaction (DBMS\_REDACT.FULL) on a column of the NUMBER data type. If you want to change it to another value (for example, 7), then you can run the DBMS\_REDACT.UPDATE\_FULL\_REDACTION\_VALUES procedure to modify this value. The modification applies to all of the Data Redaction policies in the current database instance. After you modify a value, you must restart the database for it to take effect.

**NEW QUESTION: 3**

Which question can open the discussion for solutions such as HPE StoreOnce and HPE Nimble Adaptive Flash Arrays with Veeam?

- A. What level of performance do your databases require?
- B. What effects do downtime have on your business?
- C. How virtualized is your environment?
- D. How agile are your DevOps processes?

**Answer: A**
