### **2021 Oracle 1Z0-1076-21: High Pass-Rate Oracle Cloud Platform Systems Management 2021 Specialist Valid Exam Pattern**

There are three versions of our 1Z0-1076-21 exam questions: the PDF, Software and APP online, Our 1Z0-1076-21 latest preparation materials provide users with three different 1Z0-1076-21 Free Braindumps versions, including a PDF version, a software version, and an online version.

So, users can flexibly adjust their learning 1Z0-1076-21 Valid Test Duration plans according to their learning schedule, Every page is carefully arranged by our experts, and it has the clear layout 1Z0-1076-21 Official Practice Test which brings unbelievable experience with high efficiency and high quality.

PDF version of 1Z0-1076-21 actual collection---You can use it on your personal computer by which you can easily find the part you want, make some necessary notes.

It Opens Doors to Every Dream Certification, So choosing a right Oracle Cloud Platform Systems Management 2021 Specialist [C-THR85-2105 Test Pdf](#) exam training dumps will be beneficial for your brighter future, You will enjoy the learning atmosphere of our test engine.

#### **NEW QUESTION: 1**

An integration developer is tasked with creating a new mediation module for updating records in a customer relationship management system. No back-end or front-end interface has been defined yet.

According to SOA reference architecture, what is the most suitable development approach for the export interface?

- A. End-to-end
- B. Bottom-up
- C. Top-down
- D. Meet-in-the-middle

**Answer: B**

**NEW QUESTION: 2**

You are implementing an ASP.NET application that makes extensive use of JavaScript libraries.

Not all pages use all scripts, and some scripts depend on other scripts.

When these libraries load sequentially, some of your pages load too slowly.

You need to use the ASP.NET Ajax Library Script Loader to load these scripts in parallel.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

**A.** In each page that uses scripts, add a call to `Sys.get` for each script that is needed in that page.

**B.** In your site's master page, add a call to `Sys.loader.registerScript` to define each of the scripts that are used in the site.

**C.** In your site's master page, add a call to `Sys.loader.defineScripts` to define each of the scripts that are used in the site.

**D.** In each page that uses scripts, add a call to `Sys.require` for each script that is needed in that page.

**Answer: C,D**

**NEW QUESTION: 3**

Which component is responsible for managing the distributed switching and routing modules in the hypervisor in an NSX architecture?

**A.** vCenter Server

**B.** ESXi hypervisor

**C.** NSX controller cluster

**D.** NSX manager

**Answer: C**

Explanation:

The controller cluster in the NSX platform is the control plane component responsible for managing the hypervisor switching and routing modules. The controller cluster consists of controller nodes that manage specific logical switches. The use of controller cluster in managing VXLAN based logical switches eliminates the need for multicast configuration at the physical layer for VXLAN overlay

**NEW QUESTION: 4**

Refer to the exhibit. Which field identifies the ESID of a participating switch?

**A.** SSID

- B. NTFY
- C. LID
- D. SWID

**Answer: D**
