NEW QUESTION: 1

Howard is a Google AdWords consultant for the HKQ Company. He is reviewing the videos the HKQ Company has loaded to YouTube through YouTube Insights with Hal, his contact at the HKQ Company. Howard and Hal want to review the videos performance to create a strategy to refine the videos for better performance. YouTube Insight offers several different reporting features for a YouTube account. Which one of the following is NOT one of the reporting features that YouTube Insight offers for review?

- A. Discovery
- B. Views
- C. Referrers
- D. Community

Answer: C

NEW QUESTION: 2

Universal Containers has a highly integrated environment with significant process orchestration between systems. When refreshing UAT, Objects that have external Ids from Production no longer point to valid External Ids in the UAT environment. What should an Architect do to resolve this?

- A. Mask the External Id so nobody can see the production value.
- B. Delete all the data and use an Automated testing tool to create new data across all the systems in UAT.
- C. Let UAT point to production integrations and rollback each transaction after it finishes.
- D. In the post refresh plan, modify external ids to a known valid set of values for UAT.

Answer: D

NEW QUESTION: 3

Your company has Active Directory Certificate Services (AD CS) and Network Access Protection (NAP) deployed on the network. You need to ensure that NAP policies are enforced on portable computers that use a wireless connection to access the network. What should you do?

- A. Use the Group Policy Management Console to access the wireless Group Policy settings, and disable the Prevent connections to infrastructure networks option.
- B. Configure all portable computers to use MS-CHAP v2 authentication.
- C. Configure all access points to use 802.1X authentication.
- D. Use the Group Policy Management Console to access the wireless Group Policy settings, and enable the Prevent connections to ad-hoc networks option.

Answer: C

NEW QUESTION: 4

Which IPS mode is less secure than other options but allows optimal network throughput?

- A. Promiscuous mode
- B. transparent mode
- C. inline-bypass mode
- D. inline mode

Answer: A

Explanation:

The recommended IPS deployment mode depends on the goals and policies of the enterprise. IPS inline mode is more secure because of its ability to stop malicious traffic in real-time, however it may impact traffic throughput if not properly designed or sized. Conversely, IPS promiscuous mode has less impact on traffic throughput but is less secure because there may be a delay in reacting to the malicious traffic.
