NEW QUESTION: 1

Your network contains an Active Directory forest named contoso.com. The forest contains a single domain. The forest contains three Active Directory sites named SiteA, SiteB, and SiteC. The sites contain four domain controllers. The domain controllers are configured as shown in the following table.

An IP site link exists between each site.

You discover that the users in SiteC are authenticated by the domain controllers in SiteA and SiteB. You need to ensure that the SiteC users are authenticated by the domain controllers in SiteB, unless all of the domain controllers in SiteB are unavailable. What should you do?

- A. Create additional connection objects for DC3 and DC4.
- B. Create additional connection objects for DC1 and DC2.
- C. Create an SMTP site link between SiteB and SiteC.
- D. Decrease the cost of the site link between SiteB and SiteC.

Answer: D

Explanation:

By decreasing the site link cost between SiteB and SiteC the SiteC users would be authenticated by SiteB rather than by SiteA.

NEW QUESTION: 2

Which two statements about syslog logging are true? (Choose two.)

- A. Messages can be erased when the device reboots.
- B. The size of the log file is dependent on the resources of the device.
- C. Messages are stored in the internal memory of the device.
- D. Messages are stored external to the device.
- E. Syslog logging is disabled by default.

Answer: A,D

NEW QUESTION: 3

A cloud administrator has configured a connection between two virtual private cloud environments at a public cloud provider that are each in different accounts. The administrator has configured the accounts correctly so they can connect to each other's resources. Both cloud environments have policies that allow anyone from 0.0.0.0/0 on TCP port 22. The following table shows the network configuration information:

However, the administrator is unable to establish an SSH connection from a server in 10.250.40.100 to 10.250.48.214. Which of the following is the MOST likely issue?

- A. The routing tables have not been updated correctly.
- B. The administrator does not have sufficient credentials.
- C. The IP configuration on one of the servers is incorrect.
- D. The network ACL is not configured to allow SSH access.

Answer: A

NEW QUESTION: 4

Which of the following examples are included in the application controls embedded in business process applications? Each

correct answer represents a complete solution.
Choose all that apply.

- A. Security
- B. Computer operations
- C. Validity
- D. Segregation of duties

Answer: C,D
