NEW QUESTION: 4

Your role of Network Administrator at ABC.com includes the management of the Active Directory Domain Services (AD DS) domain named ABC.com. All servers on the network run Windows Server 2012.

The corporate Web site www.ABC.com is hosted on a Windows Server 2012 Web Server hosted on the corporate network. A public IP address is mapped to the private IP address of the Web Server to provide Internet access to the corporate Web site. DirectAccess is enabled on the network using the default configuration to enable external users to access resources on the corporate network when they are away from the office. Company security policy states that all connections from outside the office to www.ABC.com must come through the corporate firewall using the external IP address of the Web site.

How can you ensure that external users cannot connect to www.ABC.com using a DirectAccess connection?

- A. By running the Remove-DAEntryPointTableItem cmdlet.
- B. By modifying the Name Resolution Policy.

C. By modifying the external IP address assigned to the Web server.

D. By running the Set-DAClientExperienceConfiguration cmdlet.

Answer: B
