Explanation:

Explanation:

Box 1: Service bus queue

You are developing a back-end Azure App Service that scales based on the number of messages contained in a Service Bus queue.

Box 2: ActiveMessage Count

ActiveMessageCount: Messages in the queue or subscription that are in the active state and ready for delivery.

Box 3: Count

Box 4: Less than or equal to

You need to add a new rule that will continuously scale down the App Service as long as the scale up condition is not met.

Box 5: Decrease count by

NEW QUESTION: 2

Quality Chemicals provides two grades of ammonia for sale. Although there is a price difference, the company wants to provide customers with the higher grade chemical whenever the lower grade chemical is out of stock. This way they ensure the best customer service.

What is the best way to set this up in SAP Business One so that the sales staff can easily find the higher grade item when the lower grade chemical is out of stock?

Please choose the correct answer.

Response:

A. Assign both items to the same item group so they can be found in the same search.

B. Set up a discount group to link the two chemical items.

C. Create a sales bill of materials to link the two items as alternate components.

D. Make the high grade chemical an alternative item to the low grade chemical.
