NEW QUESTION: 1

Company Background Corporate Information

Contoso provides managed services to medium-sized companies. Contoso has one office located in Seattle. The company has 100 full-time employees.

Existing Environment Existing Licensing Solution

Contoso purchases OEM licenses for operating systems and uses an Open License agreement to purchase licenses for Microsoft Office.

Business Requirements Planned Changes

Contoso expects to hire an additional 150 full-time employees this year.

The company hires additional temporary employees for large projects. The company leases dektops for each temporary employee. The desktops are returned at the end of the project.

In the next six months, Contoso plans to upgrade its servers from Windows Server 2003 to Windows Server 2008.

Contoso plans to add an additional phsical server that runs Windows Server 2008 and Hyper-V. The new physical server will host four virtual instances. The four virtual instances will also run Windows Server 2008.

Problem Statements

Contoso has difficulty tracking license purchases because a new license authorization number is opened for each new purchase.

Business Goals

Contoso has the following business goals:

Standardize the desktop applications across the organization
Use single product key for the installation of desktop applications

Allow internal users to access internal company documents by using a Web browser

Allow all users to create forms by using Microsoft Office InfoPath

Store all forms in a central repository.

Minimize the upfront costs of upgrading software.

Provide a flexible licensing strategy that supports the fluctuating number of employees.

Put in place long-term budget planning, while maintaining access to the latest versions of Microsoft software.

Question

You need to recommend a Volume Licensing program that meets the companys business goals. Which program should you recommend?

- A. Open Value Companywide
- B. Select License
- C. Open Value Subscription
- D. Open License

Answer: C

NEW QUESTION: 2

You are creating an application that reads from a database. You need to use different databases during the development phase and the testing phase by using conditional compilation techniques.

What should you do?
