The main office contains 1,000 client computers and 50 servers. The branch office contains 20 client computers. All computer accounts for the branch office are located in an organizational unit (OU) named SeattleComputers. A Group Policy object (GPO) named GP01 is linked to the SeattleComputers OU. You need to configure BranchCache for the branch office.

Answer :

Explanation:

Explanation:

* BranchCache is disabled by default on client computers. Take the following steps to enable BranchCache on client computers: Turn on BranchCache.

Enable either Distributed Cache mode or Hosted Cache mode.

Configure the client firewall to enable BranchCache protocols.

* Distributed Cache mode

If client computers are configured to use Distributed Cache mode, the cached content is distributed among client computers on the branch office network. No infrastructure or services are required in the branch office beyond client computers running Windows 7.

Hosted Cache mode In hosted cache mode, cached content is maintained on a computer running Windows Server 2008 R2 on the branch office network.
