### NEW QUESTION: 2

The organization's security manager wishes to back up just the Gaia operating system parameters.

Which command can be used to back up only Gaia operating system parameters like interface details, Static routes and Proxy ARP entries?

- A. migrate export
- B. upgrade export
- C. show configuration
- D. backup

**Answer: D**

Explanation:

3. System Backup (and System Restore) System Backup can be used to backup current system configuration. A backup creates a compressed file that contains the Check Point configuration including the networking and operating system parameters, such as routing and interface configuration etc., but unlike a snapshot, it does not include the operating system, product binaries, and hotfixes.
