NEW QUESTION: 1

You are creating a SQL Server Analysis Services (SSAS) cube. You need to create a time dimension. It must be linked to a measure group named Sales at the day granularity level. It must also be linked to a measure group named Salary at the month granularity level.

What should you do?

- A.** Add a measure that uses the Count aggregate function to an existing measure group.
- B.** Create several dimensions. Add each dimension to the cube.
- C.** Add a calculated measure based on an expression that counts members filtered by the Exists and NonEmpty functions.
- D.** Create a dimension. Create regular relationships between the cube dimension and the measure group. Configure the relationships to use different dimension attributes.
- E.** Add a measure group that has one measure that uses the

DistinctCount aggregate function.

F. Use role playing dimensions.

G. Create a dimension with one attribute hierarchy. Set the IsAggregatable property to False and then set the DefaultMember property. Use a many-to-many relationship to link the dimension to the measure group.

H. Add a measure that uses the DistinctCount aggregate function to an existing measure group.

I. Create a dimension. Then add a cube dimension and link it several times to the measure group.

J. Create a dimension with one attribute hierarchy. Set the IsAggregatable property to False and then set the DefaultMember property. Use a regular relationship between the dimension and measure group.

K. Create a new named calculation in the data source view to calculate a rolling sum. Add a measure that uses the Max aggregate function based on the named calculation.

L. Create a dimension with one attribute hierarchy. Set the IsAggregatable property to False and then set the DefaultMember property. Use a many-to-many relationship to link the dimension to the measure group.

M. Create a dimension with one attribute hierarchy. Set the ValueColumn property, set the IsAggregatable property to False, and then set the DefaultMember property. Configure the cube dimension so that it does not have a relationship with the measure group. Add a calculated measure that uses the MemberValue attribute property.

N. Add a hidden measure that uses the Sum aggregate function. Add a calculated measure aggregating the measure along the time dimension.

O. Use the Business Intelligence Wizard to define dimension intelligence.
