NEW QUESTION: 1

Which of the following is a key component of physical distribution market logistics?

- A. Inventory management
- B. Order processing
- C. Transportation management
- D. Warehousing

Answer: D

Explanation:

Physical distribution market logistics) involves planning, implementing, and controlling the movement of materials and

final goods to meet customer needs while earning a profit. Physical distribution systems coordinate suppliers, purchasing agents, marketers, channels, and customers. They include warehousing, transportation, and retail outlets.

NEW QUESTION: 2

Which two options are valid server pool policy qualifications? (Choose two.)

- A. user label
- B. server model
- C. description
- D. power group

Answer: B,D

NEW QUESTION: 3

Sie verwalten Microsoft SQL Server-Datenbanken für eine Organisation.

Sie müssen die Datenbanken so konfigurieren, dass sie die folgenden Anforderungen erfüllen:

- * Verschlüsseln Sie die Daten in Ruhe.
 - * Stellen Sie sicher, dass unverschlüsselte Werte für bestimmte Spalten nur mit einem Entschlüsselungsschlüssel angezeigt werden können.
 - * Stellen Sie sicher, dass auf entschlüsselte Spalten nur mithilfe von Datenbankansichten zugegriffen werden kann.
- Welche Aktionen sollten Sie ausführen? Um zu antworten, wählen Sie die entsprechenden Optionen im Antwortbereich aus.
HINWEIS: Jede richtige Auswahl ist einen Punkt wert.

Answer:

Explanation:

Explanation

Box 1: Configure TDE...in the master database

To protect all databases use a certificate in the master database

Note: TDE encrypts the storage of an entire database by using a symmetric key called the database encryption key. The database encryption key can also be protected using a certificate, which is protected by the database master key of the master database. The encryption uses a database encryption key (DEK), which is stored in the database boot record for availability during recovery. The DEK is a symmetric key secured by using a certificate stored in the master database of the server or an asymmetric key protected by an EKM module.

Box 2: Configure DDM

Dynamic data masking helps prevent unauthorized access to sensitive data by enabling customers to designate how much of

the sensitive data to reveal with minimal impact on the application layer. DDM can be configured on the database to hide sensitive data in the result sets of queries over designated database fields, while the data in the database is not changed.
