NEW QUESTION: 1

A Cisco TelePresence System 1300 Series endpoint is in the process of booting and the engineer notices a red "X" on the screen for Step 6 in the boot process. What does this red "X" indicate?

- A. The endpoint could not obtain an IP address via DHCP.
- B. The touch panel is malfunctioning.
- C. There is an error with compact flash.
- D. The endpoint failed to load its firmware.

Answer: C

Explanation:

Explanation/Reference:

Reference:

http://www.cisco.com/c/en/us/td/docs/telepresence/cts_admin/1_7/admin/guide/cts_admin.pdf Exp : if the last check mark displayed is a red "X", there has been a compact flash error. If you receive this error, contact Cisco Technical Support.

NEW QUESTION: 2

Scenario:

A Citrix Architect identifies a fault in the Active Directory design for CGE's existing XenApp environments. Group Policy Objects (GPOs) from OUs across the Active Directory apply when

end users log on to XenApp applications, creating undesirable end-user experiences.
The architect determines that CGE needs full control over which GPOs apply in the new environment.
How should the architect implement loopback processing to ensure full control over the Group Policies that are applied?

- A. Configure loopback processing with replace on a GPO linked to all OUs containing Delivery Controllers.
- B. Configure loopback processing with merge on a GPO linked to all OUs containing Delivery Controllers.
- C. Configure loopback processing with merge on a GPO linked to all OUs containing Virtual Desktop Agents.
- D. Configure loopback processing with replace on a GPO linked to all OUs containing Virtual Desktop Agents.

Answer: D

NEW QUESTION: 3

You are the controller for your company.
Company policy states that when a sales order is entered, the credit limit needs to be checked against the outstanding balance owed plus any sales order that has not been shipped, delivered, or invoiced yet.
How should you configure Microsoft Dynamics AX Distribution and Trade in this situation?

- A. In the Customer record, disable the Mandatory credit limit.
- B. In Accounts receivable parameters, set the Credit limit type to Balance+All.
- C. In Accounts receivable parameters, set the Credit limit type to Balance.
- D. In the Customer record, set the Credit limit to 0, which will check against all outstanding transactions.

Answer: B

NEW QUESTION: 4

You need to implement App2 to meet the application? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Standard

Not Shared: A Shared plan does not support Always on.

Box 2: Always on

If your function app is on the Consumption plan, there can be up to a 10-minute delay in processing new blobs if a function app has gone idle. To avoid this cold-start delay, you can

switch to an App Service plan with Always On enabled, or use a different trigger type.

Scenario: A newly developed API must be implemented as an Azure function named App2. App2 will use a blob storage trigger. App2 must process new blobs immediately.

App2 must be able to connect directly to the private IP addresses of the Azure virtual machines. App2 will be deployed directly to an Azure virtual network.

The cost of App1 and App2 must be minimized.
