NEW QUESTION: 1

- A. Option B
- B. Option C
- C. Option A
- D. Option E
- E. Option D

Answer: B

Explanation:

Modern wired networks use a network switch to eliminate collisions. By connecting each device directly to a port on the switch, either each port on a switch becomes its own collision domain (in the case of half duplex links) or the possibility of

collisions is eliminated entirely in the case of full duplex links.

NEW QUESTION: 2

You are the Office 365 administrator for your company. Employees do not have local administrative privileges on client computers.

The company has the following client computer software:

*Windows 7 and Windows 8

*32-bit and 64-bit Office 2007, Office 2010, and Office 2013

When accessing the corporate Microsoft SharePoint 2010 site, some users are unable to display SharePoint lists in the Datasheet view.

You need to ensure that all users can display SharePoint lists in the Datasheet view.

What should you do?

A. Upgrade all Office 2007 and Office 2010 versions to Office 2013.

B. Uninstall the 64-bit version of Office and then install the 32-bit version of Office.

C. Upgrade to the latest version of Office 365 ProPlus.

D. Force a reinstallation of Office by using Group Policy and specifying a network location.

Answer: B

Explanation:

Office 2010 does not include a 64-bit version of the Datasheet component. Therefore, uninstalling the 64-bit version of Office and then installing the 32-bit version is the correct option to take.

NEW QUESTION: 3

A company experiences an electric circuit failure in their data center, causing their Control Station to lose power. In addition, the primary Data Mover (DM) stops working during the power outage and the users lose connection to all shares on the VNX. However, the standby DM is still functioning.

Why did the standby DM fail to take on the role as the primary DM?

A. Standby DM could not locate the settings for the primary DM

B. State of the primary DM was not visible to the standby DM due to network problems

C. Control Station is offline

D. Hardware mismatch between the primary and standby DMs

Answer: A

NEW QUESTION: 4

Customers have recently reported incomplete purchase history and other anomalies while accessing their account history on the web server farm. Upon investigation, it has been determined that there are version mismatches of key e-commerce applications on the production web servers. The development team has direct access to the production servers and is most likely the cause of the different release versions. Which of the following process level solutions would address this problem?

- A. Adjust the firewall ACL to prohibit development from directly accessing the production server farm.
- B. Implement change control practices at the organization level.
- C. Update the vulnerability management plan to address data discrepancy issues.
- D. Change development methodology from strict waterfall to agile.

Answer: B
