#### **NEW QUESTION: 1**

You want to reduce fragmentation and reclaim unused space for

the sales table but not its dependent objects. During this operation, you want to ensure the following:

- i. Long-running queries are not affected.
- ii. No extra space is used.
- iii. Data manipulation language (DML) operations on the table succeed at all times throughout the process.
- iv. Unused space is reclaimed both above and below the high water mark.

Which alter TABLE option would you recommend?

- A. SHRINK SPACE COMPACT
- B. SHRINK SPACE CASCADE
- C. ROW STORE COMPRESS BASIC
- D. DEALLOCATE UNUSED

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

The COMPACT clause lets you divide the shrink segment operation into two phases. When you specify COMPACT, Oracle Database defragments the segment space and compacts the table rows but postpones the resetting of the high water mark and the deallocation of the space until a future time. This option is useful if you have long-running queries that might span the operation and attempt to read from blocks that have been reclaimed. The defragmentation and compaction results are saved to disk, so the data movement does not have to be redone during the second phase. You can reissue the SHRINK SPACE clause without the COMPACT clause during off-peak hours to complete the second phase.

**NEW QUESTION: 4**

You have just been assigned to take care of the Automated resources which have been setup by your company in AWS. You are looking at integrating some of the company's chef recipes to be used for the existing Opswork stacks already setup in AWS. But when you go to the recipes section, you cannot see the option to add any recipes. What could be the reason for this?

- A. The stacks were created without the custom cookbooks option. Just change the stack settings accordingly.
- B. The stack layers were created without the custom cookbooks option. Just change the layer settings accordingly.
- C. Once you create layers in the stack, you cannot assign custom recipe's, this needs to be done when the layers are created.
- D. Once you create a stack, you cannot assign custom recipe's, this needs to be done when the stack is created.

**Answer: A**

Explanation:

Explanation

The AWS Documentation mentions the below

To have a stack install and use custom cookbooks, you must configure the stack to enable custom cookbooks, if it is not already configured. You must then provide the repository URL and any related information such as a password.
