initiated

Answer: A

NEW QUESTION: 3

A company has a Product Returns report. The Return Comments query item is present in the list query but was left out of the list due to space constraints on the report page. The users have asked to see this information interactively.

How could the report author add this functionality with only minimal changes to the existing report?

A. Add a Drill-through definition to the Product name cell and set the Target to Label and Data Item to the [Return comments] query item.

B. Add Product Description as a list column and use the Render Variable property and a prompt to conditionally render the column.

C. Add HTML Items to the Product Name cell that use Report Expression to assign [Return comments] to HTML span title.

D. Insert a master-detail single row microchart to the Product column cell with transparency on and chart Tooltips property set to Absolute.

Answer: A

NEW QUESTION: 4

Which of the following is the responsibility of AWS?

A. Physically destroying storage media at end of life

B. Setting up AWS Identity and Access Management (IAM) users and groups

C. Patching guest operating systems

D. Configuring security settings on Amazon EC2 instances

Answer: A

Explanation:

Explanation

Media storage devices used to store customer data are classified by AWS as Critical and treated accordingly, as high impact, throughout their life-cycles. AWS has exacting standards on how to install, service, and eventually destroy the devices when they are no longer useful. When a storage device has reached the end of its useful life, AWS decommissions media using techniques detailed in NIST 800-88. Media that stored customer data is not removed from AWS control until it has been securely decommissioned.
