We are looking forward to your joining in us, We offer customer support [AD0-E208](#) services that offer help whenever you'll be need one, The versions of our product include the PDF version, PC version, APP online version.

If you want to know the latest information [Adobe Analytics Business Practitioner Expert](#) for the exam timely, you can choose us, we can do that for you.

NEW QUESTION: 1

Which of the following disaster recovery/continuity plan components provides the GREATEST assurance of recovery after a disaster?

- A.** Feedback is provided to management assuring them that the business continuity plans are indeed workable and that the procedures are current.
- B.** Copies of the plan are kept at the homes of key decision-making personnel.
- C.** The alternate facility will be available until the original information processing facility is restored.
- D.** User management is involved in the identification of

critical systems and their associated critical recovery times.

Answer: C

Explanation:

The alternate facility should be made available until the original site is restored to provide the greatest assurance of recovery after a disaster. Without this assurance, the plan will not be successful. All other choices ensure prioritization or the execution of the plan.

NEW QUESTION: 2

Which action does the HMC perform if a problem arises with an IBM DS8884?

- A. The HMC calls home if enabled.
- B. The HMC alerts the local client technical specialist.
- C. The HMC logs an error in EREP.
- D. The HMC initiates smart drive rebuild.

Answer: A

Explanation:

If the heartbeat information does not reach IBM, a service call to the client will be made to investigate the status of the DS8000.

Note: The DS8000 also uses the Call Home facility to send proactive heartbeat information to IBM. A heartbeat is a small message with basic product information so that IBM knows the unit is operational. By sending heartbeats, both IBM and the client ensure that the HMC is always able to initiate a full Call Home to IBM in the case of an error.
