Answer: A

NEW QUESTION: 2

A user is trying to connect to a running EC2 instance using SSH. However, the user gets a connection time out error. Which of the below mentioned options is not a possible reason for rejection?

- A. The private key used to launch the instance is not correct
- B. The access key to connect to the instance is wrong
- C. The instance CPU is heavily loaded
- D. The security group is not configured properly

Answer: B

Explanation:

Explanation/Reference:

Explanation:

If the user is trying to connect to a Linux EC2 instance and receives the connection time out error the probable reasons are:

Security group is not configured with the SSH port

The private key pair is not right

The user name to login is wrong

The instance CPU is heavily loaded, so it does not allow more connections
