Don't worry.

### **NEW QUESTION: 1**

-- Exhibit -

-- Exhibit -

Scenario: Healthy Helping Hands has created a new pilot XenApp 5 Platinum Edition farm with applications delivered to 25 pilot users. The pilot farm includes all the applications that were

previously published to the HR users and some additional applications to support Manufacturing. During the pilot week of September 14th, the users of the PositivelyPeople application reported that the application was responding slowly.

Fortunately, EdgeSight had been installed and configured in the pilot farm and was recording data during the pilot. Attached in the exhibit is the information gathered from the Transaction Network Delay report from EdgeSight.

Which theory effectively explains the data that is presented in the report?

**A.** The XenApp server is reaching maximum capacity, and the lack of physical resources on the XenApp server is causing the response delay.

**B.** The Network Delay on 9/19/2009 is probably the source of complaints from the HR Users. An average network latency of almost 9ms is unacceptable.

**C.** The XenApp server is waiting on the network packet queue to clear as evidenced by the 9ms network latency being reported.

**D.** The XenApp server is waiting on another host to respond, most likely the server hosting the PositivelyPeople database.

**Answer: D**

#### **NEW QUESTION: 2**

Which of the following DoS attacks attempts to block service or reduce activity on a host by sending ping requests directly to the victim?

**A.** Ping flood attack

**B.** Teardrop attack

**C.** SYN flood attack

**D.** Land attack

**Answer: A**

#### **NEW QUESTION: 3**
