After payment successfully, How can I get My Order ??

NEW QUESTION: 1

You are deploying a new system and are creating the RF Domain(s). Which of the following options would you use to group the APs into the same domain?

- A. By VLAN, where all APs are on the same subnet.
- B. By name, so they can be easily sorted in the tree view of the controller.
- C. By deployment phase, so configurations can be accidentally pushed to newly installed APs.
- D. By site, which can be a location where the group of installed APs can hear each other's beacons.

Answer: A

NEW QUESTION: 2

contoso.com. Azure Active Directory. Microsoft 365. SharePoint Online.

Azure, SharePoint Online.

Answer:

Explanation:

Explanation

NEW QUESTION: 3

You are asked to determine user jack's default login directory. Which command would provide you with useful information?

- A. cat /etc/default/passwd | grep jack
- B. cat /etc/group | grep jack
- C. cat /etc/shadow | grep jack
- D. cat /etc/passwd | grep jack

Answer: D

Explanation:

The /etc/passwd contains one entry per line for each user (or

user account) of the system.

All fields are separated by a colon (:) symbol. Total seven fields as follows.

1 . Username: It is used when user logs in. It should be between 1 and 32 characters in length.

2 . Password: An x character indicates that encrypted password is stored in /etc/shadow file.

3. User ID (UID): Each user must be assigned a user ID (UID). UID 0 (zero) is reserved for root and UIDs 1-99 are reserved for other predefined accounts. Further UID 100-999 are reserved by system for administrative and system accounts/groups.

4. Group ID (GID): The primary group ID (stored in /etc/group file)

5. User ID Info: The comment field. It allow you to add extra information about the users such as user's full name, phone number etc. This field use by finger command.

6 . Home directory: The absolute path to the directory the user will be in when they log in. If this directory does not exists then users directory becomes /

7 . Command/shell: The absolute path of a command or shell (/bin/bash). Typically, this is a shell. Please note that it does not have to be a shell.
