- B.** index=windows LogName=Security EventCode=5688 NOT (Account_Name=*\$)
- C.** index=windows LogName=Security EventCode=4688 NOT (Account_Name=*\$)
- D.** index=windows LogName=Security EventCode=3688 NOT (Account_Name=*\$)

Answer: C

NEW QUESTION: 2

If you have a database with four aggregate tables, how should the repository be configured to take advantage of the aggregates?

- A. By creating four new logical table sources and using the "where" section of the Content tab to specify the aggregation levels
- B. By creating four new logical table sources and using the Fragmentation content to specify the aggregation levels
- C. By creating four new logical table sources and choosing each dimension's level of aggregation in the Content tab
- D. By creating four new logical tables sources

Answer: C

Explanation:

Content Tab

Aggregation Content

You can define the aggregation (ie the group by) of:

by hierarchy level by logical column It helps you to define an aggregate navigation

http://gerardnico.com/wiki/_media/dat/obiee/bi_server/design/fact_table/obiee_fragmentation_content_one_column.jpg?w=432

Note: logical table source

Logical table sources define the mappings from a single logical table to one or more physical

tables. A logical table contains one or more logical table source. The mapping between physical

columns and logical columns are done in this element.

The definition of the logical table source is used:

The Content tab of the Logical Table Source is used to define :

NEW QUESTION: 3

During a recent compliance examination, regulatory examiners found that the bank was not conducting flood hazard area determinations before closing on construction loans.
