NEW QUESTION: 1

Which event timing is represented by the attached graphic?

Please choose the correct answer.

Response:

- A. Parallel
- B. Serial
- C. Staggered
- D. Dutch

Answer: B

NEW QUESTION: 2

You are the project manager of the NGG Project. This project will be using a new material that the project team has never worked with before. You'd like to use some preventive action to ensure that the installation of the new materials is successful in the project. Which one of the following project actions is an example of the best preventive action for this project?

- A. Hire a subject matter expert to train the project team how to install the materials.
- B. Hire a subject matter expert to install the new materials.
- C. Create incentive by rewarding the project team if they don't waste the materials.
- D. Purchase additional materials so in case the team wastes materials during their installation.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

In order to ensure that the installation of the new materials is successful in the project, you should hire a subject matter expert to train the project team how to install the materials. This is the best preventive action that you can take in case the project team has never worked on the material.

Incorrect Answers:

B: This approach practically encourages the team to waste materials without training them how to install the materials properly.

C: While this approach may work it's not the best corrective action as the project team isn't learning how to use the new materials.

D: The incentive program is flawed if the team doesn't understand how to install the new materials to begin with.

NEW QUESTION: 3

You are responsible for providing access to an Azure Data Lake Storage Gen2 account.

Your user account has contributor access to the storage account, and you have the application ID access key.

You plan to use PolyBase to load data into Azure SQL data warehouse.

You need to configure PolyBase to connect the data warehouse to

the storage account.

Which three components should you create in sequence? To answer, move the appropriate components from the list of components to the answer area and arrange them in the correct order.

Answer:

Explanation:

Step 1: a database scoped credential

To access your Data Lake Storage account, you will need to create a Database Master Key to encrypt your credential secret used in the next step. You then create a database scoped credential.

Step 2: an external data source

Create the external data source. Use the CREATE EXTERNAL DATA SOURCE command to store the location of the data. Provide the credential created in the previous step.

Step 3: an external file format

Configure data format: To import the data from Data Lake Storage, you need to specify the External File Format. This object defines how the files are written in Data Lake Storage.
