NEW QUESTION: 1

Which of the following is a valid Terraform command to create an execution plan?

- A. `terraform plan`
- B. `terraform refresh`
- C. `terraform apply`
- D. `terraform show`

Answer: B

Explanation:

References:

The `terraform plan` command is used to create an execution plan. Terraform performs a refresh, unless explicitly disabled, and then determines what actions are necessary to achieve the desired state specified in the configuration files.

This command is a convenient way to check whether the execution plan for a set of changes matches your expectations without making any changes to real resources or to the state. For example, `terraform plan` might be run before committing a change to version control, to create confidence that it will behave as expected.
