NEW QUESTION: 1

A portable computer that runs Windows 8 uses a mobile broadband connection for the corporate wireless network.

The computer also has a wired corporate network connection. The computer successfully downloads

Windows updates when connected to either network.

You need to ensure that the computer automatically downloads updates by using Windows Update while

also connected to the wireless corporate network connection.

What should you do?

A. Configure a Windows Firewall connection security rule.

B. Set the corporate wireless network to metered.

C. Configure the Specify intranet Microsoft update service location local Group Policy setting.

D. Set the corporate wireless network to non-metered.

Answer: D

Explanation:

(KSP) Setting a Wireless network to METERED allows only critical Windows Updates using that connection. Setting a Wireless network to NON-METERED allows all Windows Updates using that connection.
