Answer:

Explanation:

Explanation

Box 1: 6

Two out of three update domains would be available, each with at least 3 VMs.

An update domain is a group of VMs and underlying physical hardware that can be rebooted at the same time.

As you create VMs within an availability set, the Azure platform automatically distributes your VMs across these update domains. This approach ensures that at least one instance of your application always remains running as the Azure platform undergoes periodic maintenance.

Box 2: the West Europe region and the RG1 resource group

NEW QUESTION: 3

Why are HP VDI reference architectures for mid-sized businesses tested, sized, and optimized for a specific number of users?

- A. to enable rapid Windows-based deployments with predictable, repeatable costs and performance
- B. to lay the groundwork that will enable businesses to completely eliminate the need to refresh traditional devices
- C. to enable each solution to be bundled with an orderable part number to simplify the ordering process and ensure rapid delivery
- D. to increase the number of HP servers sold by limiting the number of supported users on a single server

Answer: B

NEW QUESTION: 4

You are configuring a plan cycle date that should be visible to managers on the Approvals tab so that they can submit their worksheets before that date. But you do not want to enforce the date because you want the managers to be able to submit their worksheets even after the date is past. Which date should you use? (Choose the best answer.)

- A. default date due
- B. worksheet update start and end dates
- C. HR extraction date
- D. evaluation period start and end dates
- E. currency conversion date

Answer: E
