Answer: B

NEW QUESTION: 2

You are an administrator for a company named Contoso, Ltd.

Contoso has an Exchange Server 2013 organization.

Contoso has a partnership agreement with a company named A). Datum Corporation.

A). Datum has an Exchange server 2013 organization.

Both organizations have a federation trust to the Microsoft Federation Gateway.

Users at Contoso plan to share their free/busy information with users at A). Datum.

You need to recommend which tasks must be performed to ensure that the A). Datum users can see the free/busy information of the Contoso users.

Which two actions should you recommend? (Each correct answer presents part of the solution. Choose two.)

A. In the Exchange Server organization of Contoso, create an organization relationship.

B. In the Exchange Server organization of Contoso, configure directory synchronization.

C. In the Exchange Server organization of Contoso, create a sharing policy.

D. In the Exchange Server organization of A). Datum, create a sharing policy.

E. In the Exchange Server organization of A). Datum, configure directory synchronization.

F. In the Exchange Server organization of A). Datum, create an organization relationship.

Answer: A,C

Explanation:

Business-to-business calendar sharing is set up by creating organization relationships.

User-to-user calendar sharing is set up by applying sharing policies.

There is no requirement for Contoso users to view the free/busy information of the A.Datum users. Therefore, we don't need to create an organization relationship in A.Datum.

Configure Federated Sharing

Step 1: Create and configure a federation trust (this has already been done here)

Step 2 (D): Create an organization relationship

An organization relationship enables users in your Exchange organization to share calendar free/busy information as part of federated sharing with other federated Exchange organizations.

Step 3 (E): Create a sharing policy

Sharing policies enable user-established, people-to-people sharing of both calendar and contact information with different types of external users. They support the sharing of calendar and contact information with external federated organizations, external non-federated organizations, and individuals with Internet access. If you don't need to configure people-to-people or contact sharing (organization-level sharing only), you don't need to configure a sharing policy.

Step 4: Configure an Autodiscover public DNS record

Note:

With federated sharing, users in your on-premises Exchange organization can share free/busy calendar information with recipients in other Exchange organizations that are also configured for federated sharing. Free/busy sharing can be enabled between two organizations running Exchange 2013 and also between organizations with a mixed Exchange deployment.

NEW QUESTION: 3

You create a Microsoft Office 365 tenant named contoso.onmicrosoft.com. You use Microsoft Azure Active Directory Connect (AD Connect) to synchronize all of the users and the UPNs from the contoso.com forest to Office 365.

You need to configure federation between Office 365 and the on-premises deployment of Active Directory.
