Answer:

Explanation:

Explanation

Target 1:

Target 2:

Target 3:

Target 4:

Note:

* target 2:

GetType() is a method you call on individual objects, to get the execution-time type of the object.

Incorrect: typeof is an operator to obtain a type known at compile-time (or at least a generic type parameter).

The operand of typeof is always the name of a type or type parameter - never an expression with a value (e.g. a variable). See the C# language specification for more details.

Reference: What is the difference of getting Type by using GetType() and typeof()?

<http://stackoverflow.com/questions/11312111/when-and-where-to-use-gettype-or-typeof>

NEW QUESTION: 2

DRAG DROP

You have a Skype for Business Server 2015 infrastructure that contains two servers. The servers are configured as shown in the following table.

You deploy a new server named Server3.contoso.com.

You need to install the Edge Server role on

Server3.contoso.com.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
