Examples

In the following example, the policy CustomerIn applies the route-policy SetLocalPref to conditionally set the local preference on a route. The parameters 20, 30, 40, and 50 are passed to the parameterized policy SetLocalPref, where the local preference is set to:

```
*20, if the community 217:20 is present in the route
*30, if the community 217:30 is present in the route
*40, if the community 217:40 is present in the route
*50, if the community 217:50 is present in the route
