NEW QUESTION: 3

Scenario:

CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application.

A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast model must be chosen that resembles this end-user group's existing delivery strategy.

It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability.

Why is deploying MGMT as a published application on Windows Server 2012 R2 with Provisioning Services the best solution?

- A. It prevents XenApp server crashes.
- B. End users are already comfortable working in a shared environment.
- C. It enables faster rollbacks.
- D. It offers a faster change process.

Answer: D
