NEW QUESTION: 3

You have an enterprise subordinate certification authority (CA).

You have a custom Version 3 certificate template.

Users can enroll for certificates based on the custom certificate template by using the Certificates console.

The certificate template is unavailable for Web enrollment.

You need to ensure that the certificate template is available on the Web enrollment pages.

What should you do?

- A. Run certutil.exe Cinstallcert.
- B. On the certificate template, assign the Autoenroll permission to the users.
- C. Run certutil.exe Cpulse.
- D. Change the certificate template to a Version 2 certificate template.

Answer: D

Explanation:

Identical to F12.

Certificate Web enrollment cannot be used with version 3 certificate templates.

Reference 2:

<http://blogs.technet.com/b/ad/archive/2008/06/30/2008-web-enrollment-and-version-3-templates.aspx>

The reason for this blog post is that one of our customers called after noticing some unexpected behavior when they were trying to use the Server 2008 certificate web enrollment page to request a Version 3 Template based certificate. The problem was that no matter what they did the Version 3 Templates would not appear as certificates which could be requested via the web page.

On the other hand, version 1 and 2 templates did appear in the page and requests could be done successfully using those templates.
