Answer: B

NEW QUESTION: 3

A small office has created an annex in an adjacent office space just 20 feet (6 meters) away. A network administrator is assigned to provide connectivity between the existing office and the new office. Which of the following solutions provides the MOST security from third party tampering?

- A. CAT5e cable run through ceiling in the public space between offices.
- B. VPN between routers located in each office space.
- C. CAT5e connection between offices via the patch panel located in building's communication closet.
- D. A WEP encrypted wireless bridge with directional antennae between offices.

Answer: B

Explanation:

A VPN connection across the Internet is similar to a wide area network (WAN) link between the sites. From a user perspective, the extended network resources are accessed in the same way as resources available from the private network.
