NEW QUESTION: 3

A company's network administrator needs to ensure a specific IP address is never assigned by a Windows Server 2012 R2 DHCP server to any device connecting to the network.

Which of the following should the administrator configure on the Windows Server 2012 R2 DHCP server?

- A. Scope properties
- B. NAP
- C. Scope options
- D. Reservation

Answer: C

Explanation:

Explanation

Configuring an IP address as a reservation will restrict a DHCP server's assignment of that address unless a specific MAC address makes a request for the address.

Exclusion is for not use the IP Address or range inside the Scope Pool, Filter is for not use the MAC Address or range.

Quick Tip: Policies can also be defined per scope or server. Policy based assignment (PBA) allows an administrator to group DHCP clients by specific attributes based on fields contained in the DHCP client request packet. This feature allows for targeted administration and greater control of configuration parameters delivered to network devices.
