**NEW QUESTION: 3**

Which two statements are true about Auto Service Request (ASR) with an X5 Database Machine?

- A. ASR Manager must be installed and configured on a dedicated server external to the Database Machine.
- B. ASR Manager must be installed and configured on one of the database servers.
- C. ASR Manager opens a service request (SR) automatically after sensors detect hardware faults.
- D. ASR can upload configuration metadata to support problem resolution.
- E. ASR communicates with Oracle support services using HTTPS.
- F. Configuring ASR is mandatory for all Database Machine

assets.

**Answer: A,C**

Explanation:

A: Oracle recommends that you install Oracle ASR Manager on an external, standalone server.

C: Oracle ASR is designed to generate Oracle service requests automatically when certain types of faults are detected on Oracle products that are qualified for Oracle ASR.

Oracle ASR works only for specific component faults. Most of the common components, such as disks, fans, and power supplies, are covered. However, some components are not covered. For example, Oracle ASR does not cover InfiniBand events; there are specific images and specific InfiniBand switch firmware that you must use. You cannot upgrade these components independently.
