You will never regret, It will certainly help **CISMP Real Sheets** candidates to enrich their knowledge and be ready to answer all questions in the real exam.

**NEW QUESTION: 1**

You are the project manager of the NHQ project in Bluewell Inc. The project has an asset valued at \$200,000 and is subjected to an exposure factor of 45 percent. If the annual rate of occurrence of loss in this project is once a month, then what will be the Annual Loss Expectancy (ALE) of the project?

- A. \$ 2,160,000
- B. \$ 108,000
- C. \$ 95,000
- D. \$ 90,000

**Answer: B**

Explanation:

The ALE of this project will be \$ 108,000. Single Loss Expectancy is a term related to Quantitative Risk Assessment. It can be defined as the monetary value expected from the occurrence of a risk on an asset. It is mathematically expressed as follows:  $SLE = \text{Asset value} * \text{Exposure factor}$  Therefore,  $SLE = 200,000 * 0.45 = \$ 90,000$  As the loss is occurring once every month, therefore ARO is 12. Now ALE can be calculated as follows:  $ALE = SLE * ARO = 90,000 * 12 = \$ 108,000$

**NEW QUESTION: 2**
