Do you want to achieve the goal of passing GAQM certification CPAM-001 exam as soon as possible?

#### **NEW QUESTION: 1**

Your company has a Microsoft 365 subscription.

The company's new security policy states that when a user account is deleted, the Microsoft OneDrive data of the user must be retained for 180 days, and then deleted.

You need to implement the security policy.

What should you do?

- A.** From the Security&Compliance admin center, create a retention policy
- B.** From the Security&Compliance admin center, create a data loss prevention (DLP) policy
- C.** From the OneDrive admin center, configure the Storage settings
- D.** Form the OneDrive admin center, configure the Compliance settings

#### **Answer: C**

Explanation:

Explanation/Reference:

Explanation:

If a user's Office 365 account is deleted, their OneDrive for Business files are preserved for a period of time that you can specify.

To set the retention time for OneDrive accounts

1. Open the OneDrive admin center, and select Storage in the left pane.

2. Enter the number of days you want to retain OneDrive files in the Days to retain files in OneDrive after a user account is marked for deletion box.

The count begins as soon as you delete the user account in the Microsoft 365 admin center, even though the deletion process takes time. The maximum value is 3650 days (ten years).

3. Click Save.

### **NEW QUESTION: 2**

You are developing a data storage solution for a social networking app.

The solution requires a mobile app that stores user information using Azure Table Storage.

You need to develop code that can insert multiple sets of user information.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### **Answer:**

Explanation:

Explanation

Box 1, Box 2: TableBatchOperation

Create the batch operation.

```
TableBatchOperation op = new TableBatchOperation();
```

Box 3: ExecuteBatch

```
/ Execute the batch operation.
```

```
table.ExecuteBatch(op);
```

Note: You can insert a batch of entities into a table in one write operation. Some other notes on batch operations:

You can perform updates, deletes, and inserts in the same single batch operation.

A single batch operation can include up to 100 entities.

All entities in a single batch operation must have the same partition key.

While it is possible to perform a query as a batch operation, it must be the only operation in the batch.
