NEW QUESTION: 2

To ensure that there is no gap between the customer's expectation from the project, and the deliverables produced, the Scrum Master has to eliminate environmental obstructions that the team may face, that may affect the quality of the deliverables. To do so, apart from Quality Planning, the team has to ensure Quality Control, and Quality Assurance. Which of the following statements is true regarding Quality Assurance and Quality Control?

- A.** Quality Control lessons are learned during the Sprint Retrospect meeting; Quality Assurance is demonstrated during the Sprint Review Meeting.
- B.** Quality Control activities are carried out during the process of Creating Deliverables that are potentially shippable; Quality Assurance activities are usually standalone activities, not carried out as part of the work.
- C.** Quality Control involves execution of planned quality activities; Quality Assurance involves carrying out integration-type activities.
- D.** Specific skills are not required to perform Quality Control activities; Quality Assurance is a significant factor of the definition of Done.

Answer: A

Explanation:

Explanation

Quality control refers to the execution of the planned quality activities by the Scrum Team in the process of creating deliverables that are potentially shippable. It also includes learning from each set of completed activities in order to achieve continuous improvement. Within the cross-functional team, it is important to have the skills necessary to perform

quality control activities. During the Sprint Retrospect Meeting, team members discuss lessons learned. These lessons act as inputs into continuous improvement and contribute to the improvement of ongoing quality control.

Quality is required not only in products, but also in processes. Quality assurance refers to the evaluation of processes and standards that govern quality management in a project to ensure that they continue to be relevant. Quality assurance activities are carried out as part of the work. In fact, quality assurance is a significant factor of the definition of Done. The deliverable isn't complete if appropriate quality assurance has not been conducted. Often, quality assurance is demonstrated during the Sprint Review Meeting.
