Now we are famous in this field for [CSBA](#) our high passing rate to assist thousands of candidates to clear exams.

#### **NEW QUESTION: 1**

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. In a remote site, a support technician installs a server named DC10 that runs Windows Server 2012 R2. DC10 is currently a member of a workgroup.

You plan to promote DC10 to a read-only domain controller (RODC).

You need to ensure that a user named Contoso\User1 can promote DC10 to a RODC in the contoso.com domain. The solution must minimize the number of permissions assigned to User1.

What should you do?

- A.** From Ntdsutil, run the local roles command.
- B.** Join DC10 to the domain. Run dsmod and specify the /server switch.
- C.** From Active Directory Users and Computers, run the Delegation of Control Wizard on the contoso.com domain object.
- D.** From Active Directory Administrative Center, pre-create an RODC computer account.

**Answer: D**

Explanation:

A staged read only domain controller (RODC) installation works in two discrete phases:

1. Staging an unoccupied computer account
2. Attaching an RODC to that account during promotion

Reference: Install a Windows Server 2012 R2 Active Directory Read-Only Domain Controller (RODC)

**NEW QUESTION: 2**

Which of the following best describes the main benefit of the RTGS payment system?

- A. Lower costs through less labor intensive methods
- B. Reduced market risk due to smaller values of open positions
- C. Final settlement of interbank funds transfers on a continuous, trade by trade basis throughout the day
- D. Lower costs through fewer payments passing through nostro accounts

**Answer: C**

**NEW QUESTION: 3**

You need to update the Inventory API.

Which development tools should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:
