NEW QUESTION: 1

A gap analysis for the Transactions set does not refer to

A. the practice of and comparing that content to what is required by HIPPA, and ensuring there is a match.

B. the practice of identifying the data content you currently have available through your medical software

C. and requires that you study the specific format of a regulated transaction to ensure that the order of the information when sent electronically matches the order that is mandated in the Implementation Guides.

D. but does not require that you study the specific format of a regulated transaction to ensure that the order of information when sent electronically matches the order that is mandated in the Implementation Guides.

Answer: D

NEW QUESTION: 2

The VP of marketing approaches you and requests that you change the visitor logon screen on the company's website to include a username with at least six characters. This is considered

- A. ongoing operations
- B. project initiation
- C. project execution
- D. a project

Answer: A

Explanation:

Projects exist to create a unique product, service, or result. The logon screen in this question is not a unique product. A minor change has been requested, indicating this is an ongoing operation function. Some of the criteria for projects are that they are unique, temporary with definitive start and end dates, and considered complete when the project goals are achieved.

NEW QUESTION: 3

IBM Flash System 900

IBM Flash System 900 is a solid state drive (SSD) that is designed for high performance and low latency. It is used in various applications, including data centers and enterprise environments.

IBM Flash System 900 is a solid state drive (SSD) that is designed for high performance and low latency. It is used in various applications, including data centers and enterprise environments.

IBM Flash System 900 is a solid state drive (SSD) that is designed for high performance and low latency. It is used in various applications, including data centers and enterprise environments.

IBM Flash System 900 is a solid state drive (SSD) that is designed for high performance and low latency. It is used in various applications, including data centers and enterprise environments.

IBM Flash System 900 is a solid state drive (SSD) that is designed for high performance and low latency. It is used in various applications, including data centers and enterprise environments.

IBM Flash System 900 is a solid state drive (SSD) that is designed for high performance and low latency. It is used in various applications, including data centers and enterprise environments.

IBM Flash System 900 is a solid state drive (SSD) that is designed for high performance and low latency. It is used in various applications, including data centers and enterprise environments.

Answer: D

NEW QUESTION: 4

In which location is Cisco Unified Presence enabled for a specific user in Cisco Unified Communications Manager?

- A. User Administration
- B. Advanced Features
- C. Application
- D. on the IP phone
- E. Capabilities Assignment

Answer: E

Explanation:

Explanation

Capabilities Assignment allows system administrators to enable the Cisco Unified Presence (CUP) and Cisco Unified Personal Communicator (CUPC) capabilities for users. You must ensure that licenses for CUP and CUPC are available.
