Even if you are an industry rookie, you can understand professional knowledge very easily, Free CTAL-TA\_Syll2019\_UK Exam Braindumps PDF Demo.

**NEW QUESTION: 1**

Which energy source represents the largest potential energy store in the body?

- A. Blood glucose.
- B. Protein.
- C. Muscle glycogen.
- D. Fat.

**Answer: D**

#### **NEW QUESTION: 2**

- A. Use the aspnet\_regiis.exe command-line tool.
- B. Use the xsd.exe command-line tool.
- C. Use assembly attributes.
- D. Use the gacutil.exe command-line tool.

**Answer: C**

Explanation:

The Windows Software Development Kit (SDK) provides several ways to sign an assembly with a strong name:

\*Using the Assembly Linker (Al.exe) provided by the Windows SDK.

\*Using assembly attributes to insert the strong name information in your code. You can use either the AssemblyKeyFileAttribute or the AssemblyKeyNameAttribute, depending on where the key file to be used is located.

\*Using compiler options such /keyfile or /delaysign in C# and Visual Basic, or the /KEYFILE or /DELAYSIGN linker option in C++. (For information on delay signing, see Delay Signing an Assembly.)

Note:

\*A strong name consists of the assembly's identity-its simple text name, version number, and culture information (if provided)-plus a public key and a digital signature. It is generated from an assembly file (the file that contains the assembly manifest, which in turn contains the names and hashes of all the files that make up the assembly), using the corresponding private key. [\[email#160;protected\]](#) Visual [\[email#160;protected\]](#) .NET and other development tools provided in the .NET Framework SDK can assign strong names to an assembly.

Assemblies with the same strong name are expected to be identical.

#### **NEW QUESTION: 3**

Which statement is true about cluster interconnect?

- A. It is a management network for cluster administration and

can be used for interconnect LIFs.

**B.** It provides the core data network communication.

**C.** It transports the data between nodes if a Data LIF has a non-optimized path.

**D.** It is needed for the replication network between clusters.

**Answer: C**
