NEW QUESTION: 3

Coherence*Web Edition is a management point in a Work breakdown structure (WBS), which is used to consolidate and process work package data and forward the results to the project manager. It is built on top of Oracle Coherence (Coherence), which brings Coherence data grid's data scalability, availability, reliability, and performance to in-memory session management and storage. Coherence*Web Edition can be deployed to many mainstream application servers such as Oracle GlassFish Server, Oracle WebLogic Server, IBM WebSphere, Tomcat, and so on. Coherence*Web Edition enables HTTP session sharing and management across different Web applications, domains, and heterogeneous application servers. Session data can be stored in data caches outside of the application server, thus freeing application server heap space and enabling server restarts without losing session data.
