Answer: C

Explanation:

Explanation

Since the database should not be hosted on the cloud all other options are invalid.

The best option is to create a VPN connection for securing traffic as shown below.

Option B is invalid because this is the incorrect use of the Storage gateway Option C is invalid since this is the incorrect use of the NAT instance Option D is invalid since this is an incorrect configuration For more information on VPN connections, please visit the below URL

http://docs.aws.amazon.com/AmazonVPC/latest/UserGuide/VPC_VPN.html

The correct answer is: Build the application server on a public subnet and the database at the client's data center. Connect them with a VPN connection which uses IPsec Submit your Feedback/Queries to our Experts

NEW QUESTION: 2

Which statement best describes SOA governance continuous improvement?

- A.** SOA governance continuous improvement enables your organization to define and deploy your own focused and customized SOA governance model.
- B.** SOA governance continuous improvement enables your organization to make sure that Services are reused.
- C.** SOA governance continuous improvement enables your organization to define and deploy your own focused and customized SOA initiative.
- D.** SOA governance continuous improvement enables your organization to achieve ROI on you SOA initiative.

Answer: C

Explanation:

The goal of the SOA Governance Framework is to enable organizations to define and deploy their own focused and customized SOA Governance Model.

Since aspects of the SOA Governance Model require culture change, an SOA Governance Regimen should never be deployed in a big-bang approach. The framework defines an incremental deployment approach so that organizations can continue to meet their current demands while moving towards their long-term goals for SOA.

NEW QUESTION: 3

The Frame Relay network in the diagram is not functioning properly.

What is the cause of the problem?

- A.** The frame-relay map statement in the Attalla router for the PVC to Steele is not correct
- B.** The IP address on the serial interface of the Attalla router is configured incorrectly
- C.** The S3 interface of the Steele router has been configured with the frame-relay encapsulation ietf command
- D.** Inverse ARP is providing the wrong PVC information to the Gallant router
- E.** The Gallant router has the wrong LMI type configured

Answer: A
