What is more, we will offer you free new version if you have purchased our C_S4CSC_2105 training engine before.

NEW QUESTION: 1

What can be used to modify settings such as power management and boot order on HP ProLiant Servers?

- A. HP Virtual Connect Manager
- B. HP iLO Federation
- C. HP Intelligent Provisioning
- D. ROM-Based Setup Utility

Answer: D

NEW QUESTION: 2

Your network contains an Active Directory domain named contoso.com. The domain contains two sites named Site1 and Site2 and two domain controllers named DC1 and DC2. Both domain controllers are located in Site1.

You install an additional domain controller named DC3 in Site1 and you ship DC3 to Site2.

A technician connects DC3 to Site2.

You discover that users in Site2 are authenticated by all three domain controllers.

You need to ensure that the users in Site2 are authenticated by DC1 or DC2 only if DC3 is unavailable.

What should you do?

- A. From Active Directory Sites and Services, move DC3.
- B. In Active Directory Sites and Services, modify the Query Policy of DC3.
- C. From Network Connections, modify the IP address of DC3.
- D. In Active Directory Users and Computers, configure the insDS-PrimaryComputer attribute for the users in Site2.

Answer: A

Explanation:

DC3 needs to be moved to Site2 in AD DS

Incorrect:

Not A. Modifying IP will not effect authentication

Not B. A query policy prevents specific Lightweight Directory Access Protocol (LDAP) operations from adversely impacting the performance of the domain controller and also makes the domain controller more resilient to denial-of-service attacks.

Reference: Move a domain controller between sites
