- A. Drill-to-detail must be enabled on the custom report type.
- B. The dashboard component type must be a gauge.

C. The source report must be grouped by record name, record owner, or feed post.

D. The source report must be stored in the drill-to-detail folder.

Answer: C

NEW QUESTION: 2

A consultant is working on a business initiative involving three business units, each of which uses a different enterprise architecture framework. Which action should the consultant take to efficiently and effectively establish and leverage business architecture to form an integrated approach and solution?

A. Utilize a different architecture framework approach for each business unit and then compare and align business perspectives

B. Define core business architecture domains for each business unit and then try to align them using each framework

C. Map out the business processes for each of the three organizations and then align those processes through the view of each framework

D. Map an enterprise view of core business architecture domains and use it to analyze gaps and similarities across business units

Answer: D

NEW QUESTION: 3

Scenario:

You have been asked by your customer to help resolve issues in their routed network.

Their network engineer has deployed HSRP. On closer inspection HSRP doesn't appear to be operating properly and it appears there are other network problems as well. You are to provide solutions to all the network problems.

You have received notification from network monitoring system that link between R1 and R5 is down and you noticed that the active router for HSRP group 1 has not failed over to the standby router for group 1. You are required to troubleshoot and identify the issue.

A. There is an HSRP group number mismatch

B. There is an HSRP authentication misconfiguration

C. There is an HSRP group track command misconfiguration

D. There is an HSRP group priority misconfiguration

E. This is not an HSRP issue; this is routing issue.

Answer: C

Explanation:

When looking at the HSRP configuration of R1, we see that tracking has been enabled, but that it is not tracking the link to R5, only the link to R2:

R1 should be tracking the Eth 0/1 link, not 0/0 to achieve the desired affect/

NEW QUESTION: 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

Your network contains an Active Directory domain named contoso.com. The domain contains a DNS server named Server1. All client computers run Windows 10. On Server1, you have the following zone configuration.

You have the following subnets defined on Server1.

You need to prevent Server1 from resolving queries from DNS clients located on Subnet4. Server1 must resolve queries from all other DNS clients.

Solution: From a Group Policy object (GPO) in the domain, you modify the Network List Manager Policies.

Does this meet the goal?

A. Yes

B. No
