It's easy to pass exam with 20 to 30 hours on learning our E-ACTCLD-21 dumps torrent questions.

NEW QUESTION: 1

Which of the following methods of protection operates on server responses?

- A. HTTP RFC compliancy check and metacharacter enforcement
- B. Response code validation and response scrubbing
- C. Dynamic parameter protection
- D. Response code validation and HTTP method validation

Answer: B

NEW QUESTION: 2

You are developing an application that will be deployed to multiple computers. You set the assembly name.

You need to create a unique identity for the application assembly.

Which two assembly identity attributes should you include in the source code? (Each correct answer presents part of the solution. Choose two.)

- A. AssemblyDelaySignAttribute
- B. AssemblyVersionAttribute
- C. AssemblyCompanyAttribute
- D. AssemblyProductAttribute
- E. AssemblyCultureAttribute

Answer: B,E

Explanation:

The AssemblyName object contains information about an assembly, which

you can use to bind to that assembly. An assembly's identity consists of the following:

Simple name.

Version number.

Cryptographic key pair.

Supported culture.

D: AssemblyCultureAttribute

Specifies which culture the assembly supports.

The attribute is used by compilers to distinguish between a main assembly and a satellite

assembly. A main assembly contains code and the neutral culture's resources. A satellite

assembly contains only resources for a particular culture, as in

```
[assembly:AssemblyCultureAttribute("de")]
```

E: AssemblyVersionAttribute

Specifies the version of the assembly being attributed.

The assembly version number is part of an assembly's identity and plays a key part in

binding to the assembly and in version policy.

NEW QUESTION: 3

.Which of the following would prevent accountability for an

action performed, thus allowing nonrepudiation?

- A. Proper identification
- B. Proper identification, authentication, AND authorization
- C. Proper identification AND authentication
- D. Proper authentication

Answer: C

Explanation:

If proper identification and authentication are not performed during access control, no accountability can exist for any action performed.
