EEB-101 Study Guide Practice Materials and EEB-101 Actual Dumps and Torrent - Mecatronica

We apply international recognition third party for payment, [P3 Exam Score](#) therefore if you choose us, your safety of money and account can be guaranteed, We are online for 24 hours.

When you are preparing EEB-101 exam practice exam, it is necessary to grasp the overall knowledge points of real exam by using the latest EEB-101 exam study material.

According to your actual need, you can choose [EEB-101](#) the version for yourself which is most suitable for you to preparing for the coming exam, 100% refund will be offered [Valid H13-431 V2.0 Study Materials](#) to those candidates who fail in the exam after preparing it with our material.

Salesforce EEB-101 Dumps Instant Download: Upon successful payment, Our systems will automatically send the product you have purchased to your mailbox by email.

Whether you are at intermediate or inferior stage, you can totally master these contents effectively, Mecatronica guarantees you pass EEB-101 exam at first attempt.

This exam is part one of a series of three exams that test the **Certification EEB-101 Book Torrent** skills and knowledge necessary to implement a core Windows Server 2012 infrastructure in an existing enterprise environment.

Free PDF Salesforce - EEB-101 - Updated Essentials for Marketing Cloud Email Marketers Certification Book Torrent

That is why we do allow our clients to claim for their money back if they donâ€™t pass the Salesforce EEB-101 exam, Now please focus your attention on our Salesforce Essentials for Marketing Cloud Email Marketers exam [Essentials for Marketing Cloud Email Marketers](#) training material & Essentials for Marketing Cloud Email Marketers exam simulators, unexpected effects will be shown for you.

Many people are afraid of walking out of their comfortable zones, About the updated Salesforce study material, our system will send the latest one to your payment email automatically as soon as the EEB-101 updated.

Salesforce EEB-101 test braindumps materials will be the only option for ambitious people who have great and lofty dreaming, The client only needs 20-30 hours to learn our EEB-101 learning questions and then they can attend the test.

Will you feel nervous in facing the real exam, Choosing us is [Exam CMT-Level-III Labs](#) the most useful way to improve your grade and chance to pass the exam, and the easiest access to success without accident.

you can download online EEB-101 demo test before purchasing it, Multiple guarantees for passing.

NEW QUESTION: 1

You are developing an ASP.NET MVC application to be used on the Internet. The environment does not use Active Directory. Users must be able to log on to the application to maintain their personal preferences.

You need to use the least amount of development effort to enable users to log on.

What should you do?

- A. Generate server SSL certificates and install them in IIS.
- B. Enable Forms authentication.
- C. Enable Digest authentication.
- D. Enable Windows authentication.

Answer: B

Explanation:

Many Web applications require a way to restrict access to some resources (such as specific pages) so that those resources are accessible only to authenticated users. The default Web application project template for ASP.NET MVC provides a controller, data models, and views that you can use to add ASP.NET forms authentication to your application. The built-in functionality lets users register, log on and off, and change their password. For many applications, this functionality provides a sufficient level of user authentication.

Incorrect:

Not B: Windows authentication would require an Active Directory.

Windows authentication method works only if the following two conditions exist:

/ You set up your network to use the Kerberos authentication protocol that requires Active Directory.

/ You set up the computers and accounts on your network as trusted for delegation.

NEW QUESTION: 2

You need to recommend which changes must be implemented to the network before you can deploy the new web application.

What should you include in the recommendation?

A. Upgrade the DNS servers to Windows Server 2012.

B. Change the forest functional level to Windows Server 2008 R2.

C. Upgrade the domain controllers to Windows Server 2012.

D. Change the functional level of both the domains to Windows Server 2008 R2.

Answer: C

Explanation:

The web application is in the sales.contoso.com domain, which will have Windows Server 2012 Domain controllers. We should therefore upgrade the other domain controller to Windows Server 2012.

Scenario:

* The new sales.contoso.com domain will contain a web application that will access data from a Microsoft SQL Server located in the contoso.com domain. The web application must use integrated Windows authentication. Users' credentials must be passed from the web applications to the SQL Server.

* Planned changes include: create a child domain named sales.contoso.com. Only the domain controllers in sales.contoso.com will host a zone for the sales.contoso.com domain. The domain controllers in sales.contoso.com will run Windows Server 2012.

Topic 4, Proseware, Inc

Overview

General Overview

Proseware, Inc. is a pharmaceutical services company that has a sales department, a marketing department, an operations department, and a human resources department.

Physical Locations

Proseware has two main offices. One of the offices is located in New York. The other office is located in Chicago. The New York office uses a 172.16.1.0/24 network ID. The Chicago office uses a 192.168.1.0/24 network ID.

The offices connect to each other by using a high-bandwidth, low-latency WAN link. Each office connects directly to the Internet.

Existing Environment

The network contains an Active Directory forest named proseware.com. The forest contains two domains named proseware.com and chicago.proseware.com. All of the user accounts and the computer accounts in the New York office reside in the proseware.com domain. All of the user accounts and the computer accounts in the Chicago office reside in the chicago.proseware.com domain. All DNS zones are

Active-Directory-integrated.

Each office is configured as an Active Directory site. The network ID for each office is associated to the appropriate site.

Each office contains two domain controllers. The domain controllers were recently upgraded from Windows Server 2008 R2 to Windows Server 2012 R2. The functional level of the domain and the forest is Windows Server 2003.

The company uses Active Directory user attributes to store the personal information of its employees in custom attributes.

Existing Servers

The relevant servers are configured as shown in the following table.

All servers run Windows Server 2012 R2.

DC01 has an IPv4 scope. The starting IP address in the range is 172.16.1.100 and the ending address is 172.16.1.199.

DC03 has an IPv4 scope. The starting IP address in the range is 192.168.1.100 and the ending IP address is 192.168.1.199. There are no exclusion ranges configured on DC01 or DC03.

Requirements

Planned Changes

Proseware plans to implement the following changes:

- *Deploy a read-only domain controller (RODC) to the London office.

- *Give users remote access to both offices by using a VPN connection from their laptop or tablet.

- *If DC01 fails, ensure that the computers in the New York office can receive IP addresses within 30 minutes.

- *In the New York site, deploy two 50-TB, Fibre Channel SAN disk arrays.

Offloaded Data Transfer (ODX) will be used on both storage arrays. The Hyper-V hosts will use the new SANs for virtual machine storage.

*Open three additional offices in Montreal, Atlanta, and London. The offices will connect to each other by using a high-bandwidth, low-latency WAN link. Each office will connect directly to the Internet.

*For legal reasons, the Montreal site will have its own forest named montreal.proseware.com.

*The Montreal and Atlanta offices will have local IT administrators to manage the network infrastructure of their respective office. The London office will not have a local IT staff. Each office will have approximately 50 client computers.

Technical Requirements
Proseware identifies the following technical requirements:

*Users in the Montreal office must only be allowed to access shares that are located on File01 and File02. The Montreal users must be prevented from accessing any other servers in the proseware.com forest regardless of the permissions on the resources,

*Users in the New York office must be able to reconnect to the remote access VPN servers automatically. Users in the Chicago office must use SSL to connect to the remote access VPN servers.

*Domain controllers that run Windows Server 2012 R2 and Windows Server 2008 R2 must be able to be deployed to the proseware.com domain.

*Administrators in the New York office must be able to restore objects from the Active Directory Recycle Bin.

*The DNS servers must be prevented from overwriting the existing DNS entries that have been stored in cache.

*Each DNS server must be managed by an administrator from the same office as the DNS server.

*The required time to create new fixed virtual hard disks (VHDs) on the SANs must be minimized.

*The remote access servers must be able to restrict outgoing traffic based on IP addresses.

*All certificates must be deployed to all of the client computers by using auto-enrollment.

*All of the DHCP Server server roles must be installed on a domain controller.

*Only one DHCP server in each site must lease IP addresses at any given time.

*DHCP traffic must not cross site boundaries.

*RODCs must not contain personal user information.
