NEW QUESTION: 2

You are developing code for an application that retrieves information about Microsoft .NET Framework assemblies. The following code segment is part of the application (line numbers are included for reference only):

You need to insert code at line 04. The code must load the assembly. Once the assembly is loaded, the code must be able to read the assembly metadata, but the code must be denied access from executing code from the assembly.

- D. `Assembly.ReflectionOnlyLoadFrom(bytes);`

Answer: B

Incorrect:

Not A: The `Assembly.ReflectionOnlyLoadFrom` method (`String`) loads an assembly into the reflection-only context, given its path.
