Our supporter of GB0-191-ENU study guide has exceeded tens of thousands around the world, which directly reflects the quality of them, If you purchasing our GB0-191-ENU simulating questions, you will get a comfortable package services afforded by our considerate after-sales services.

Pass Guaranteed Quiz 2021 H3C Fantastic GB0-191-ENU Reliable Braindumps Pdf

The product Mecatronica provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the pass your GB0-191-ENU exam by the method which is convenient for you.

H3C exam certifications has a sound name across the global H3C market, Before the purchase, the clients can download and try out our GB0-191-ENU study materials freely.

Do you still complaint that your working abilities **Reliable GB0-191-ENU Braindumps Pdf** can't be recognized and you have not been promoted for a long time, If you buy our Constructing Small - and Medium - Sized Enterprise Network guide torrent and take it seriously consideration, **Reliable GB0-191-ENU Braindumps Pdf** you will find you can take your exam after twenty to thirty hours' practice.

We offer you a unique opportunity of examining our H3C GB0-191-ENU products prior to place your buying order, Thirdly, the PDF version of Constructing Small - and Medium - Sized Enterprise Network best questions materials is easy to carry and do less harm to your eyes.

Mecatronica has offered the GB0-191-ENU printable edition of all the questions and answers of H3C GB0-191-ENU exam dumps, Besides, we promise you full refund if you failed exam with our Constructing Small - and Medium - Sized Enterprise Network pass test guaranteed materials.

NEW QUESTION: 1

Welcher der folgenden Ports muss eine Firewall passieren, damit der SNMP-Verkehr seinen Standardport weiterleiten kann? (Wählen Sie ZWEI).

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4
- F. 5

Answer: A,D

NEW QUESTION: 2

Which three steps are necessary to enable SSH? (Choose three.)

- A. generating an RSA or DSA cryptographic key
- B. generating an AES or SHA cryptographic key
- C. configuring the version of SSH
- D. configuring a domain name
- E. configuring VTY lines for use with SSH
- F. configuring the port for SSH to listen for connections

Answer: A,D,E

Explanation:

Here are the steps:1. Configure a hostname for the router using these commands.

```
yourname#configure terminalEnter configuration commands, one per line. End with
```

```
CNTL/Z.yourname (config)#hostname LabRouterLabRouter(config)#
```

2.Configure a domain name with the ip domain-name command followed by whatever you would like your domain name to be. I used CiscoLab.com. LabRouter(config)#ip domain-name CiscoLab.com

3.We generate a certificate that will be used to encrypt the SSH packets using the crypto key generate rsa command. Take note of the message that is displayed right after we enter this command. "The name for the keys will be.

LabRouter.CiscoLab.com" - it combines the hostname of the router along with the domain name we configured to get the name of the encryption key generated; this is why it was important for us to, first of all, configure a hostname then a domain name before we generated the keys. Notice also that it asks us to choose a size of modulus for the key we're about to generate. The higher the modulus, the stronger the encryption of the key. For our example, we'll use a modulus of 1024.

4.Now that we've generated the key, our next step would be to configure our vty lines for SSH access and specify which database we are going to use to provide authentication to the device. The local database on the router will do just fine for this example. LabRouter(config)#line vty 0

```
4LabRouter(config-line)#login
localLabRouter(config-line)#transport input ssh
```

5.You will need to create an account on the local router's database to be used for authenticating to the device. This can be accomplished with these commands. LabRouter(config)#username XXXX privilege 15 secret XXXX

Reference.
