You administer devices in your corporate environment. The company allows employees to bring their own devices (BYOD). All BYOD devices must run Windows 10. For employees who elect to not use BYOD, the company provides a corporate laptop.

The company has a Microsoft Intune subscription and all BYOD devices have the Intune client installed.

None of the BYOD devices are joined to the domain. All the corporate standard devices are managed by System Center Configuration Manager (SCCM).

You have an application that was developed in house that must be installed on all the BYOD devices.

The application must be installed automatically on the BYOD devices without any user intervention.

Solution: You download and install a sideloading product

activation key on all of the BYOD devices. You upload the application to the Intune storage and configure the app deployment action as required install.

Does the solution meet the goal?

A. No

B. Yes

**Answer: A**
