Using only commands included with named, what is the command, with options or parameters, to make named re-read its zone files?

**Answer:**

Explanation:

rndc reload

**NEW QUESTION: 3**

Which two tools will prompt you for the possible creation of ASM instances in a RAC environment? (Choose two.)

- A. SRVCTL
- B. DBCA
- C. OUI
- D. ASMCMD
- E. VIPCA

**Answer: B,C**

**NEW QUESTION: 4**

Web Cache Communication

Protocol **WCCP** is a Cisco Adaptive Security Appliance (ASA) protocol used for Web Security Appliance (WSA) communication. It is used to redirect traffic to a WSA for inspection and filtering. The protocol is implemented on the ASA and the WSA. The ASA acts as a client and the WSA acts as a server. The ASA sends requests to the WSA and the WSA responds with the filtered traffic. The protocol is used to protect web traffic from malicious attacks and to enforce security policies. The protocol is implemented on the ASA and the WSA. The ASA acts as a client and the WSA acts as a server. The ASA sends requests to the WSA and the WSA responds with the filtered traffic. The protocol is used to protect web traffic from malicious attacks and to enforce security policies.

```

**Answer: A**

**Explanation:**

We can see from the output that the number of routers (ASA's) is 1, so there is a single ASA or an active/ standby pair being used, and 1 Cache Engine. If the ASA's were in a active/active role it would show up as 2 routers.
